About Crydom

Crydom is the leading brand of Solid State Relays in the US and fast becoming the preferred choice of companies around the world. Thousands of catalog off-the-shelf items are available, as well as custom-designed Solid State Relays and related products. Crydom continues to satisfy the most demanding customers' environmental and performance requirements.

At Crydom virtually everything is accomplished in-house to assure complete control over delivery, production, and above all quality. With design, development, manufacturing and management personnel under one roof, we're geared for fast response to your requirements.

Crydom has acquired an impressive list of patents in solid state relay technology, while continuing to create new circuit and technology-related inventions as part of our ongoing R & D programs. In addition, our seasoned group of engineers is available to assist you in creating a product solution that is perfectly suited to your specific application.

A metallized ceramic substrates and power components used in our power modules and relays are produced in-house — a major factor in Crydom's reputation for uncompromising performance and reliability.

Crydom quality assurance conducts ongoing product reliability verification tests, including 100% verification at final test. After units are completely assembled, they must pass a complete battery of electrical tests. All tests are actually performed twice, once prior to encapsulation and then again afterward.

Because of our dedication to quality Crydom was one of the first American companies to achieve full certification to the demanding standards of ISO 9001. In addition, most Crydom products are approved by UL, CSA, VDE and carry the CE Mark signifying conformance with the latest European directives—further proof of exceptional levels of performance.

Learn how an alliance with the world leader in solid state relays and power semiconductor modules can pay off for you. For details, contact your authorized Crydom sales representative or distributor today.
